## Too many powers

The election this month of the Speaker of the House of Commons was a long-drawn-out affair. Even though the role of the speaker is to preside over the House, it is not until the speaker is elected that the House can begin its work.

Canadian prime minister Jean Chretien has been considering that he should not be the speaker, but the people of Canada have elected him to be the speaker. Chretien has been elected to be the speaker, but the people of Canada have elected him to be the speaker.

That is not good enough for me to grant someone the sweeping powers that someone in the office.

The prime minister is a person who is elected to be the speaker, but the people of Canada have elected him to be the speaker. The prime minister is a person who is elected to be the speaker, but the people of Canada have elected him to be the speaker.

All this and more without constitutional authority. The prime minister is a person who is elected to be the speaker, but the people of Canada have elected him to be the speaker.

So the prime minister is a person who is elected to be the speaker, but the people of Canada have elected him to be the speaker. The prime minister is a person who is elected to be the speaker, but the people of Canada have elected him to be the speaker.

So the prime minister is a person who is elected to be the speaker, but the people of Canada have elected him to be the speaker. The prime minister is a person who is elected to be the speaker, but the people of Canada have elected him to be the speaker.

## Question of the Week

### Are beauty pageants degrading to women?

"Yes, because I don't think women should be on display. It's like a bunch of women going out and showing."
